Economics Study Guide

- What is a consumable good?
- A consumable good is an item that is used up and needs to be replaced regularly, such as food, beverages, or paper products.
- What are SMART goals?
- SMART goals are Specific, meaning they are clear and precise.
- SMART goals are Measurable, meaning their progress can be tracked and assessed.
- SMART goals are Achievable, meaning they are realistic and attainable.
- SMART goals are Relevant, meaning they align with broader objectives.
- SMART goals are Time-bound, meaning they have a clear deadline or time frame.

- What is the Federal Reserve System?
- The Federal Reserve System conducts the nation's monetary policy by influencing money and credit conditions in the economy.
- The Federal Reserve System regulates and supervises financial institutions to ensure the safety and soundness of the nation's banking and financial system.
- The Federal Reserve System maintains the stability of the financial system and contains systemic risk in financial markets.
- The Federal Reserve System provides financial services to the U.S. government, financial institutions, and the public, facilitating the nation's payments system.
- Time frame of goals
- Short-term goals - goals that can be achieved in the near future, typically within a year
- Intermediate goals - goals that are set to be achieved in one to five years
- Long-term goals - goals that are planned to be achieved over a longer period, usually beyond five years
